

# LLWGS 2011 MEMBERS-ONLY POND TOUR (stops 4 to 6)

## STOP NO. 4:

Another backyard oasis in an urban setting. This pond in Jerome is off a backyard deck and patio and is landscaped beautifully to blend into the rest of the yard.

## STOP NO. 5:

A home in a quiet neighborhood on Springfield's north side features another beautiful setting for the owners' completely redone pond. The homeowners generously shared their stories of trial and error, designing their own filtration system and their surprisingly simple treatments for string algae. And as with most ponds one water feature is not enough as you see in the pondless water feature nestled in the plantings.

## STOP NO. 6:

The LLWGS' secretary and his wife again generously opened their home and yard to the group as the last stop on the tour and a chance to share refreshments and fellowship.
